Optimum Search

1-HOUR ONLINE INTRODUCTORY SESSION

Unpacking Construction Chaos

An Introduction to 'Expert Triage' in the Built Environment

Discover how systematic analysis can help untangle complex construction disputes—before spending thousands on expert reports.

DATE

October 2026 Sessions

SAVE A SEAT

TIME

1 Hour

Online (Zoom / MS Teams)

FOR

Postgraduate Students

(Construction, Law, Property, Built Environment and related fields)

WHAT YOU'LL LEARN

Why construction cases become complex
Understand the common causes of dangerous and disruptive defects in modern building projects.

What is Expert Triage?
Learn the concept of system vs. technical engineering analysis and how it helps prioritise legal and technical spend.

The bigger picture
See how to analyse project governance, documentation and liability pathways.

Real-world examples
Insights from the Defects Dilemma research and high-profile building defect cases.

IDEAL FOR POSTGRADUATE STUDENTS IN

- Construction Management
- Building and Project Management
- Law (Construction, Property, Commercial)
- Architecture and Design
- Property Development
- Engineering
- and other related disciplines

> "A must-attend for emerging professionals who want to understand the real-world complexities behind construction disputes."
